

I used the code from the lab before and added grafana docker image to my docker compose and it worked.

```
joaoribeiro@JOACAPC:~/cAdvisor_Lab$ docker compose up -d
WARN[0000] /home/joaoribeiro/cAdvisor_Lab/docker-compose.yml: the attribute `version` is obsolete, it will be ignored, please remove it to avoid potential confusion
[+] up 3/3
✓ Container grafana Started
✓ Container cAdvisor Started
✓ Container redis Started
```

So I went to Grafana's browser:

Went to Dashboard Label:

Already created the Dashboard with the redis metrics:

And I changed the threshold from my graphic as you can see.

Also in time series:
