

Terraform plan output:

```
joao@beiro@JOACAPC:~/tf-mod-reusable$ terraform plan

Terraform used the selected providers to generate the following execution plan. Resource actions are indicated with the following symbols:
+ create

Terraform will perform the following actions:

# azure_rm_resource_group.rg_demo will be created
+ resource "azure_rm_resource_group" "rg_demo" {
+   id           = (known after apply)
+   location     = "eastus"
+   name         = "rg-reuse-mod-lab-joao"
}

# module.my_network_bundle.azure_rm_subnet.subnetA will be created
+ resource "azure_rm_subnet" "subnetA" {
+   address_prefixes = [
+     "10.10.1.0/24",
+   ]
+   default_outbound_access_enabled = true
+   enforce_private_link_endpoint_network_policies = (known after apply)
+   enforce_private_link_service_network_policies = (known after apply)
+   id = (known after apply)
+   name = "frontend-subnet"
+   private_endpoint_network_policies = (known after apply)
+   private_endpoint_network_policies_enabled = (known after apply)
+   private_link_service_network_policies_enabled = (known after apply)
+   resource_group_name = "rg-reuse-mod-lab-joao"
+   virtual_network_name = "vnet-reuse-lab-joao"
}

# module.my_network_bundle.azure_rm_subnet.subnetB will be created
+ resource "azure_rm_subnet" "subnetB" {
+   address_prefixes = [
+     "10.10.2.0/24",
+   ]
+   default_outbound_access_enabled = true
+   enforce_private_link_endpoint_network_policies = (known after apply)
+   enforce_private_link_service_network_policies = (known after apply)
