

All containers running:

```
joao@grafana-vm-joao:~/prometheus-config$ sudo docker ps
CONTAINER ID   IMAGE                                COMMAND                  CREATED        STATUS        PORTS                               NAMES
c0b159f0a1bd   grafana/grafana                    "/run.sh"               2 minutes ago Up 2 minutes  0.0.0.0:3000->3000/tcp, [::]:3000->3000/tcp   grafana
344597459d82   prom/prometheus                    "/bin/prometheus --c..." 4 minutes ago Up 4 minutes  0.0.0.0:9090->9090/tcp, [::]:9090->9090/tcp   prometheus
7fb77bc9c2a1   quay.io/prometheus/node-exporter:latest "/bin/node_exporter ..." 5 minutes ago Up 5 minutes  0.0.0.0:9100->9100/tcp, [::]:9100->9100/tcp   node-exporter
```

I had to “open” the ports on Azure VM to get access to grafana, prometheus and node-exporter.

Prometheus is scraping from the node-exporter. Note that cAdvisor has an error because i didn't pull his image from docker:

← → ↻ Inseguro 20.55.17.127:9090/targets

Prometheus Query Alerts Status Target health

Select scrape pool Filter by target health Filter by endpoint or labels

cadvisor 0 / 1 up

node 1 / 1 up

| Endpoint                          | Labels                                   | Last scrape   | State |
|-----------------------------------|------------------------------------------|---------------|-------|
| http://node-exporter:9100/metrics | instance="node-exporter:9100" job="node" | 4m 5.416s ago | UP    |

Here we have the grafana dashboard with the cpu usage:
